

Environmental Policy Statement

Colt's vision is to be the most customer orientated business in our industry.

Colt recognises that good environmental performance is good business, managing its environment impact benefits the organisation and its customers.

Colt recognises its key environmental impacts rest in the following areas:

- Energy management;
- Waste stream life cycles;
- Natural resource sustainability;
- Responsible supply chains.

Senior management endorses this policy ensuring it is compatible within the context and strategic direction of the company.

We, at Colt, strive to adopt the highest standards and behaviours in all areas of our operations, meeting all legislative criteria, by:

- Incorporating environmental responsibility into all business operations through planning environmental protection, reviewing processes and procedures, setting targets and auditing environmental performance.
- Protecting the environment, preventing pollution and meeting all specific commitments relevant to our organisation.
- Meeting legal compliance obligations, as these relate to the environmental aspects of our business.
- Mitigating waste streams through efficient use of materials and energy, adopting the principles of "reduce, reuse and recycle".
- Training of employees on good environmental practice and encouraging the involvement in environmental initiatives.
- Making environmental and ethical considerations where appropriate in investment decisions, purchasing sustainable products and services wherever practicable.

Colt regularly reviews its policies, the Environmental Management System (EMS) and environmental objectives and targets in line with ISO 14001:2015 standard.

All Colt employees have responsibilities for policy implementation by participating and contributing to its success through their actions and suggestions.

The company communicates openly with all stakeholders and interested parties on its environmental system, and to such end, this statement is made available to all company employees, clients, contractors and the general public on demand.

Carl Grivner
