Canon recommends you use Canon Media for the best results. Please check media (paper) compatibility list to see which variety of paper/media is recommended.

Genuine Canon ink cartridges are developed together with Canon large format printers as an important part of the large format printer printing system. Advanced technologies achieved by our research and development activities are incorporated into these ink cartridges. For optimum performance of Canon large format printers, Canon recommends use of genuine Canon ink cartridges.

Canon

Bring your images to life with Canon imagePROGRAF large format print solutions, ensuring outstanding print quality and unrivalled productivity for photography/fine art applications.

Whether you're a professional photographer, print service provider or fine art production specialist, Canon's large format printers are designed to meet contemporary demands for the most sophisticated print quality. With increased accuracy and an extended colour range, they give you the confidence to deliver your best work every time.

Which printer is right for you?

The comprehensive range of large format printers encompasses eight specialist devices, spanning 17" (A2) up to 60" printing. All are incredibly easy to work with, leaving you free to focus all your attention on your masterpieces in the making.

17" (A2)

- High levels of colour and detail bring images to life: 12 colour PRO-1000
- The A2 photographic choice, with roll media handling: 12 colour iPF5100

24" (A1)

- The perfect balance of photo print quality and productivity with optional spectrophotometer: 8 colour iPF6400S
- Feature packed with the highest quality colour and photo imaging quality with optional spectrophotometer: 12 colour iPF6450
- The highest quality colour, photo and imaging quality, speed and reliability: 12 colour PRO-2000

44" (B0)

- The perfect balance of photo print quality and productivity with space-saving design: 8 colour PRO-4000S
- Outstanding LUCIA PRO quality, at impressive speeds, with up to 44" large format production output: 12 colour PRO-4000

60"

- Outstanding LUCIA PRO quality at impressive speeds, with up to 60" large format production output: 8 colour PRO-6000S
- The highest quality colour and photo imaging quality: 12 colour iPF9400

Outstanding quality

Optional extras

A spectrophotometer

For streamlined and high quality colour management, including across multiple devices in different locations. Available as an option on iPF6400S and iPF6450.

Multi-Function Roll System

The newly developed Multi-Function Roll System makes it possible to support dual roll feed and rewinding rolls with a single printer. This efficiently supports continuous high-volume printing and long printing.

Added value

Canon's simple to use print software provides the perfect workflow link between your image and the finished printed product. Designed specifically for our professional printers, Canon Plugins help you achieve expert quality photo prints with ease.

Innovations as standard

Unique colour control

- The 12 colour LUCIA EX and LUCIA PRO ink sets deliver long-lasting deep, rich and expressive results.
- Achieve uniform glossiness, improve light reflection and reduce bronzing on glossy paper with Canon's Chroma Optimiser ink technology*.
- Consistency and accuracy from an inbuilt densitometer.

Efficient productivity

Hot Swap ink tanks and nozzle detection and compensation, as well as built-in HDD**, L-COA or L-COA PRO Processors and the unique advantages of FINE print head engineering.

*Available for PRO-Series only ** Some models only
